DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to an image sensing apparatus that provides a higher power supply voltage or higher clock signal to the sensor block than to the signal processing block, classified in class 348, subclass 372.
- II. Claims 10-15, drawn to an image sensing apparatus capable of independently turning on and off the power source and the clock of each processing system, classified in class 348, subclass 294.
- III. Claims 16-20, drawn to an image sensing apparatus that can change the frequency of the clocks supplied to each processing system, classified in class 348, subclass 302.

Inventions of Groups I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions of Groups I, II, and III have separate utilities such as:

Group I does not require the ability to independently turn on and off the power supply and clock or the ability to change the frequency of the clock, as required by Groups II and III, respectively, in order to supply a higher voltage or clock signal to the sensor block than to the signal processing block.

Application/Control Number: 09/444,675

Art Unit: 2697

Group II does not require the ability to supply a higher voltage or clock signal to the sensor block than to the signal processing block or the ability to change the frequency of the clock, as required by Groups I and III, respectively, in order to independently turn on and off the power supply and clock.

Group III does not require the ability to supply a higher voltage or clock signal to the sensor block than to the signal processing block or the ability to independently turn on and off the power supply and clock, as required by Groups I and II, respectively, in order to change the frequency of the clock.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement by traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dorothy Wu whose telephone number is 703-305-8412. The examiner can normally be reached on Monday-Friday, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Christensen can be reached on 703-308-7644.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Art Unit: 2697

Washington, D.C. 20231

Or faxed to:

(703) 872-9314

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703)306-0377.
